Objective

I'm a dedicated SQA Engineer with a B.Sc. in Computer Science & Engineering, skilled in QA methods, project management, and CI/CD. I have hands-on experience with diverse testing tools and agile methodologies. My strong focus on documentation and reporting ensures quality, transparency, and efficient project delivery.

Experience

Associate, Quantanite BD Ltd June 2024 – Present

- Validated large-scale datasets and live media content to ensure strict adherence to client guidelines and quality standards.
- Monitored real-time content streams to identify risks and maintain high-accuracy decision-making under pressure.
- Utilized Google Sheets for structured reporting and Teamwork for workflow and issue tracking.
- Coordinated with cross-functional teams and international clients to clarify requirements and deliver consistent quality outcomes.

Junior SQA Engineer, Skiff Technologies April 2024 – June 2024
Contractual

- Developed comprehensive test plans and executed detailed test cases to identify software defects.
- Deepened understanding of the SQA lifecycle and the critical role of SQA in software delivery.
- Actively worked within a Jira-based environment following Scrum methodologies.
- Collaborated with cross-functional teams to ensure high-quality software releases.

Software Quality Assurance Intern, iLearnX Technologies Jan 2024 – March 2024

- Plan, execute, and monitor test cycles for web applications.
- Completed 70% of the iLearnX test cases through manual and automated testing.
- Gained hands-on experience with ClickUp, Jira, and Agile Scrum methodologies, including sprint planning and project tracking.
- Managed documentation ensuring all project details are recorded and accessible in Git and via Allure reporter.

Education

American International University-Bangladesh, BSc in Computer Science & Engineering. Jan 2020 – Apr 2024

- GPA: 3.19/4.0 (Certificate)
- Coursework:** Software Quality Testing, Software Requirement Engineering, Software Development & Engineering.

Projects

SauceDemo E2E Automation Framework github.com/Showrav88/sawglab

- Engineered a robust end-to-end automation framework using **Playwright** and **JavaScript** to validate critical paths (Login, Cart, Checkout).
- Integrated **Allure Reports** for detailed visual tracking of test execution and failure analysis.
- Conducted API testing using **Postman** to ensure backend endpoint reliability.

iLearnX.net Test Automation github.com/Showrav88/ilearnx

- Achieved 70% test coverage through a hybrid approach of manual exploratory testing and automated scripts.
- Documented system architecture using **Draw.io** and managed defect tracking via **Jira** and **ClickUp**.
- Leveraged **SQL** for database validation to ensure data integrity during testing.

Jewelry Management System (Full-Stack) github.com/Showrav88/JewelryMS

- Engineered a .NET 9 Web API using Clean Architecture and PostgreSQL to manage complex jewelry inventory and sales.
- Implemented automated invoice generation and dynamic gold return policy logic based on Bangladesh Jeweller's Association - BAJUS's industry standards.

Technologies

Programming & Web: C#, JavaScript, SQL, C++, HTML5, CSS3.

QA & Automation: Playwright, Selenium, Postman, Allure Reporting, Manual Testing.

Management & Tools: Jira, ClickUp, Git, MS SQL Server, PostgreSQL, VS Code, DB Diagram, Google Sheets.
